**RESPONSE TO OFFICE ACTION**

**IN THE CLAIMS**

Please amend the claims as follows. In addition, please add claims 69-73 as set forth below.

Claims 1-44 (Canceled)

45. (Currently Amended) A medical device, comprising:
- a hollow barrel having a forward end and a first connector;
  - a needle assembly, comprising:
    - a needle having a sharpened tip operable between a projecting position in which the sharpened tip of the needle projects forwardly from the barrel and a retracted position in which the sharpened tip is retracted rearwardly;
    - a spring biasing element biasing the needle toward the retracted position; and
    - a second connector that is cooperable with the first connector to attach the needle assembly to the barrel;
  - a plunger displaceable in the barrel to a terminal position in which the plunger is adjacent the forward end of the barrel, said plunger having an
